EXPERIENCE

Software Analyst

Jul 2021 - Jun 2023

TIAA GBS

Pune, MH

- Migrated a mulesoft api to springboot api for managing customer interactions in Oracle DB.
- Developed a a full-stack web application for call centers using Spring Boot, Java, and Angular. Achieved a 30% reduction in average call time, enhancing overall customer support efficiency and satisfaction.
- Contributed in development and debugging of a new internal framework being adopted in 80% of the new projects.
- Collaborated with teams to work on 4 major projects and led a team of 3 members.
- Enhanced the performance of a legacy Spring API by 90% through optimizations with database connections and spring context management.

Game Developer Intern

Feb 2021 - Jun 2021

Stareout Games

Hyderabad, TS

- Built rapid game prototypes for androids and released on play store.
- Contributed to creating visually aesthetic demos and marketing, resulting in a prototype's 4-star rating on google play store.
- Worked closely with cross-functional team to develop 5 game prototypes.

SKILLS

Programming Languages: Java, Python, Javascript, C#, HTML/CSS, SQL, FTL

Frameworks & Libraries: Springboot, Angular, React, NodeJS, ExpressJS, NextJS, JUnit, Hadoop

Tools & Platforms: Git, Docker, Openshift, Google Cloud Platform, AWS, ETL

Soft Skills: Leadership, Report writing, Accountability, Problem solving, Time management

EDUCATION

Dalhousie University (GPA : 4.2/4.3)

Halifax, NS

Masters in Applied Computer Science

Sep 2023 - May 2025

SGGS IE & T (GPA : 3.5/4)

Nanded, MH

Bachelors of Technology in Computer Science

Aug 2017 - May 2021

PROJECTS

QuickHire [Link](#) | [Sourcecode](#)

React, NodeJS, ExpressJS, Mongo, Firestore, StripeAPI

- Constructed a freelancer marketplace designed to connect freelancers with clients.
- Collaborated on developing the application using Express serving a REST API with React as the frontend. Created with a focus on user interface, usability and responsiveness.
- Planned the project including market research, feature prioritization.

Skillswap [Sourcecode](#)

NextJS, Springboot, Java, SQL, Upstash Redis, Tailwind, JUnit, Docker

- Developed a platform enabling individuals to assist neighbors with various tasks or share their skills.
- Led the development team, managing task prioritization and team coordination.
- Worked on both frontend, backend, wrote JUnit test cases and handled DevOps tasks.
- Integrated a real-time chat feature using Upstash Redis and Pusher service.
- Designed and implemented a GitLab CI/CD pipeline to automate project build, testing, quality assurance, and deployment processes. Utilized GitLab Runner and Docker for deployment to a remote virtual machine.

Java_SQL [Sourcecode](#)

- Created a database management system made using Java without any external library. The system supports transaction management.
- Implemented an authentication feature using MD5 hashing and added captcha verification to it.
- Added a query parser to interpret and execute SQL queries.
- Ensured data persistence by storing the data in files.
